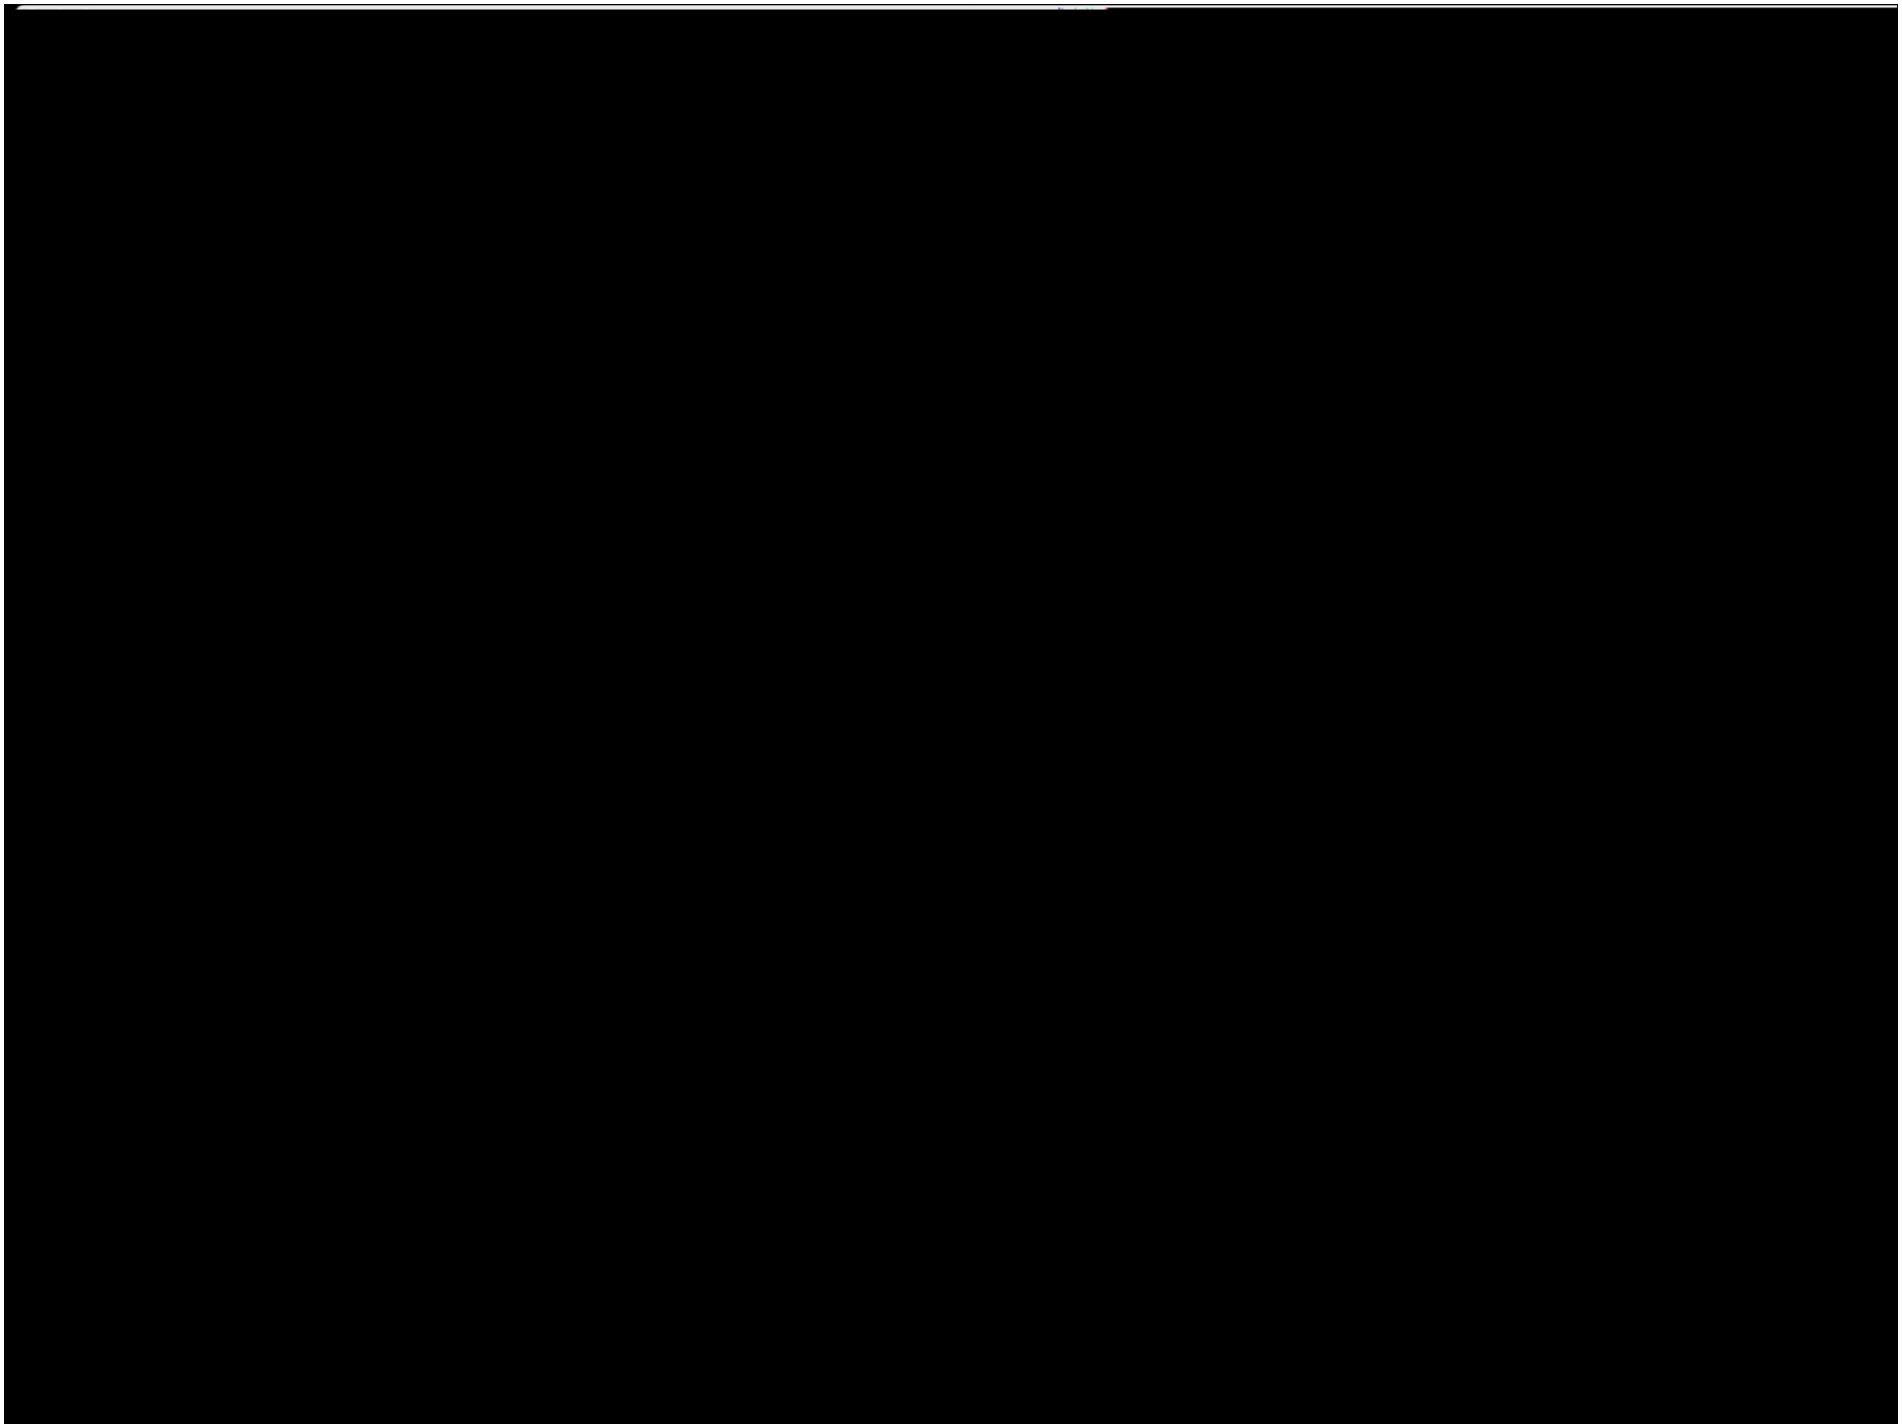
Examples

- Scraping HTML - (you name it!)



- Let's fetch the author list for each article.

Pubmed Dates

XPath language

- So I use library(RCurl)
- reply = getForm("

Processing the result

- read.table ?

```
v = getNodeSet(nj, "//table[tr/td/b/text()='Total Precincts']")
```

- xmlEventParse(content,
  list(startElement = function(node, ...)....,
  endElement = function(node, ...) ...,
  text = function(x) ...,
